## **CULTURE TOPIC**

### **Eating with hands**

Eating with hands has not only been a part of our culture but is still being practiced by many across the country.

It's usually considered that using hands for eating is healthy for your gut, as the good bacteria on your hands gets into your tummy and help to fight bad bacteria.

Eating with hands also helps in forming a connection with food, which makes food seem tastier.

### Eating with silver cutlery

Eating in silver plates has been a part of Indian tradition since long.

You will find several mentions of people eating with silver spoons and plates in historical scriptures as well.

Traditionally, it's believed that eating with silver cutlery is actually good for your body as silver has anti-viral and anti-bacterial properties, which helps to fortifying the food you
